

Taps Wall System

The Insign taps wall is an innovative self-pour beverage system, designed for convenience and quality. Each system is engineered to be easily modified to suit your business' needs.

Features:

- Proven Multi-flow systems
- Advanced iPourIt taps system technology
- Premium Micro-Matic utilities
- Mobile, fixed, and wall units available
- Decor/finishes custom to each location

Potential Applications:

Wall Unit - Fixed
86"W x 96"H (Depth Varies)

The wall unit includes 6-10 taps and is built into an existing wall. This unit can house the cooler below the counter (self contained) or the cooler can be placed behind the wall, allowing for a shorter projection from the wall (external cooler, low profile).

Island Unit - Fixed
86"W x 40"D x 96"H

The Fixed Island Unit includes 6-12 taps and is a free-standing self contained unit. All equipment can be accessed through the back side of the unit (see below). The exterior decor is custom to each location. Built in lighting and shelving is also available.

Island Unit - Mobile
66"W x 36"D x 96"H

The Mobile Island Unit includes 6 taps and is a free-standing self contained unit. All equipment can be accessed through the back side of the unit (see below). The exterior decor is custom to each location. Built in lighting and shelving is also available.

Completely self contained; full access to equipment and refrigerator. Access doors blend into surface when closed.
